

CAREER OBJECTIVE

I am a BCA student with a strong interest in full-stack web development. Currently learning the MERN stack, I'm passionate about building real-world applications. I'm seeking my first professional opportunity to apply my skills.

EDUCATION

Bachelor of Computer Applications (BCA), Computer Application 2023 - 2026
Hierank Business School (HBS)

Percentage: 63.00%

PROJECTS

[Movie Tra ↗](#)

Apr 2025

Movie Search App (React.js)

I built a movie search application using React.js and the OMDb API. The app allows users to search for movies by title and view detailed information such as poster, release year, genre, plot, and ratings.

Features:

- Built using React functional components and hooks (useState, useEffect)
- API integration with OMDb and YouTube
- Embedded trailer preview using YouTube iframe
- Error handling for invalid search queries
- Responsive and user-friendly design

This project helped me gain strong experience with APIs, dynamic UI rendering, and React hooks.

[Clothing website ↗](#)

Mar 2025

Clothing Store Website

I developed a responsive and interactive clothing website using HTML, CSS, and JavaScript. The website showcases various categories of apparel with stylish product cards, smooth navigation, and a user-friendly interface.

Features include:

- Product listing with images, names, and prices
- Main image preview on product click
- Add to Cart system using localStorage
- Mobile-friendly responsive design
- Clean and modern UI

This project helped me strengthen my front-end development skills and understand the structure of e-commerce websites."
