SUMMARY

Enthusiastic BCA student passionate about creating impactful digital experiences using modern technologies. Looking to collaborate with a talented development team to contribute to company goals while improving my technical expertise in the web development.

SKILLS

Html	React.js	Express.js
Css	Tailwind	MongoDB
Java script	Node.js	C++

PROJECTS

My-Portfolio React.js , TailwindCss ,Gsap ,Node.js,Express.js
I designed and developed a personal portfolio website to showcase my projects, skills, and achievements in a clean and interactive way. The site features smooth animations, responsive layouts, and a visually appealing design that adapts across all devices. It highlights my frontend development journey and provides recruiters with direct access to my live projects and contact information.

Movie Trailer App
React.js , Css
I built a movie trailer application that allows users to search for any movie and instantly view details such as title, release year, ratings, genre, and plot. The app fetches accurate movie data using the OMDb API and automatically displays related trailers through the YouTube Data API, offering an engaging, all-in-one experience for movie lovers.

Weather App
React.js , Css
I developed a weather application that provides real-time weather updates for any city around the world. The app displays key information such as temperature, humidity, wind speed, and weather conditions in a clean and user-friendly interface. It uses a public weather API to fetch accurate and up-to-date data and includes proper error handling for invalid city names or connectivity issues.

Clothing website
Html, Css, Javascript, Node.js, Express.js, MongoDb
I developed a fully responsive clothing e-commerce website focused on a clean and modern user interface. The website includes product display pages with images, categories, and a smooth layout for a seamless shopping experience. It features engaging animations and transitions for better user interaction and includes an Admin page that allows adding new products through a form, with product management features currently under development. This project helped me strengthen my skills in creating interactive, user-friendly designs and managing complex layouts effectively.
